Dear Ms. Jno Baptiste,

I am excited to apply for the Full Stack Developer Co-op position at Vocalmeet for Summer 2026. I am a third-year Computer Science student at the University of Guelph with hands-on experience building, launching, and iterating on full-stack products, and I am drawn to Vocalmeet's focus on creating modern, scalable platforms with strong user experience.

I have developed multiple real-world applications end to end, taking them from idea to deployment and active use. One example is QuickPDF, a full-stack web application I built to streamline PDF processing workflows. I designed the frontend, backend APIs, and deployment pipeline, and iterated based on user feedback. The platform has been launched and has had early usage by 100+ users, giving me experience building software that people rely on in practice.

I am also the lead developer of MatchUp, a sports-tech platform designed to organize and run competitive tournaments. I built the entire system, including a SwiftUI frontend, a Java Spring Boot backend, a MySQL database, and cloud deployment. I am now focused on planning the growth of the product as I prepare for release, learning how technical decisions affect adoption, usability, and scalability.

Alongside my projects, I have gained industry experience through multiple internships. At \*\*The Co-operators\*\*, I supported Azure infrastructure, troubleshoot CI/CD and resource issues, and built Python automation tools. At the \*\*University of Guelph Family Health Study\*\*, I cleaned and structured large survey datasets and developed a web application that dynamically generates SQL queries to help researchers quickly assess data availability. At \*\*S2H\*\*, I built a React-based feature that visualizes purchasing relationships using API-driven data and MySQL queries. These roles strengthened my ability to collaborate across teams and deliver maintainable, production-ready software.

I am available for a 4-month co-op term in Summer 2026 and would welcome the opportunity to contribute my full-stack experience and product-focused mindset to Vocalmeet. Thank you for your time and consideration.

Sincerely,  
Rand Kamaleddine
